

# Genuine Vortex Air Technology Truck Air Cleaners

available through

Trucking in Australia is rough. You know it, and we do, too. That's why Australia is home to the largest and heaviest road trains in the world. It's also why you need to upgrade to Vortex Air Technology Truck Air Cleaners.

13" and 15" diameter Truck Air Cleaners can withstand the toughest conditions Australia has to offer because of their superb design and engineering. When you buy a 15" Vortex Air Technology Truck Air Cleaner, you can expect filtration at 99.98% efficiency, over 1600 CFM at 8" H<sub>2</sub>O, attention to detail in construction, impeccable finish, and quality craftsmanship. Each Vortex Air Technology Truck Air Cleaner is carefully handcrafted, using only the best T304 Stainless Steel and is finished to a highly polished No. 7 buff, which is still unmatched.

Truck Air Cleaners are available in 13" and 15" diameters that fit Kenworth and Peterbilt trucks. 15" models comply with standard top servicing. 13" models offer easy bottom servicing to avoid frustrations caused by mirror brackets.

For customer service, please refer to your local authorized dealer.

They were the first of its kind on the road, and though some have tried to duplicate, there is no match for a genuine Vortex Air Technology Truck Air Cleaner.

• **Only the toughest air cleaners belong on the toughest trucks** •

**Produced in America by an American Manufacturer.**
